STANDARD AUTOMOTIVE EQUIPMENT

One of our Popular Wrench Sets

RAY Socket Wrench Sets, product of the Packer Auto Specialty Co., have become widely known as serviceable and reliable tools. We supply a large variety of special wrenches and sets to meet all requirements. The mechanic, car owner, garageman, farmer or other tool-user can find in our line a set especially adapted to his needs—and at moderate cost. The set illustrated above is one of our best numbers. It contains nineteen hexagon and three square screw-machine sockets and a variety of handles. Complete wrench catalog will be sent on request.

The STAMPCO Windshield Wiper shown below is one of our fastest moving items. Every motorist knows that a clear windshield in rain or fog is essential to his safety. The main bar is spring steel, while the wiper is heavy, new Para rubber. The price is especially low.

Frame

The STANDARD Line of Automotive Equipment includes not only RAY Wrenches, mentioned above, but also the Rubber Pedal Pads made by Geo. H. Rives Mfg. Co. These three companies, all under the same control and management, have combined their Export Departments to serve you better and more efficiently. Address all inquiries to:

Special
for
Fords

The RAY set illustrated is one in demand by every Ford owner and service station. It contains all the special sizes and shapes required for some of the more inaccessible Ford parts. Speeds up repair work and increases service station profits.

Below is illustrated our One-Man Speeder for Fords. With this wrench one man can do the work of two on Ford engine base bolts and nuts. A real work saver and priced to sell.

No. 318

Packer Auto Specialty Co., makers of RAY Wrenches, George H. Rives Mfg. Co., famous for Rives Pedal Pads, and Standard Motor Parts Co., making "Stampco" Windshield Wipers Steering Wheels, Radiator Caps, Step Plates, and other products, have combined their Export Departments to serve you better and more efficiently.
